Ornamentals

1914—CATALOGUE AND PRICE LIST—1914

HARRY L. SQUIRES

REMSENBURG, N. Y.

GOOD GROUND, N. Y.

NINETEEN HUNDRED FOURTEEN

I TAKE pleasure in again presenting to my customers my annual catalog of plants and seeds, and I thank them for their splendid patronage of last season. My business, during 1913, increased about threefold, and this year, expecting another large increase, I am fully equipped to fill all orders; large or small, in first-class shape, with first-class stock.

Agents Wanted

TO sell Fruit Trees, Strawberry, Raspberry, Blackberry, Currant, Gooseberry, Grape, Asparagus and Vegetable Plants.

I pay a liberal cash commission to agents for selling the stock in this catalogue. There is good money to be made in this business, all the year round and year after year, especially when you can handle such a full line of first class trees and plants as I have listed. Either all or a part of your time can be profitably spent in pushing the sale of this stock. You can begin in the fall or winter taking orders for fruit trees, berry plants, asparagus and vegetable plants for early spring delivery, and keep on all during the spring and summer, if you wish, taking orders for vegetable plants, and all during the summer and fall for pot grown and runner strawberry plants, raspberry and blackberry plants and fruit trees for summer and fall delivery. Practically every farmer, market gardener and owner of a small home garden buys more or less of this stock some time during the year. Orders for fruit trees often run as high as 500 and 1,000 each; for strawberry plants, as high as 20,000 and 30,000 each; for asparagus plants, as high as 10,000 and 15,000 each; and for cabbage, cauliflower, celery and tomato plants, as high as 40,000 and 50,000 each. I also have a wholesale arrangement with one of the largest seed companies in America, whereby I can fill any orders you take for seed and allow you a good cash commission for selling them. By handling such a full line of trees, plants and seeds, an agent can sell something to practically every land owner in any rural community. Selling nursery stock and seeds is unlike most agency propositions, for instead of trying to sell people something they do not want, you are offering them something that they have to buy and something that is going to help them to make money. Besides this, your customers will usually buy of you several times each year, and deal with you year after year. Any one with a little spare time at any time during the year can take up this work profitably, and any one who can devote considerable time to it can build up a substantial and permanent business. There never was a greater demand for nursery stock than now and the demand is rapidly increasing. The proposition I shall offer you will enable you to sell plants, trees and seeds at reasonable prices, not at the exorbitant prices often charged. Write for particulars.

HARRY L. SQUIRES

Remsenburg, N. Y.

Good Ground, N. Y.

PLEASE READ THE FOLLOWING CAREFULLY

HOW TO ORDER. Send in your orders as early as possible. Be sure to write plainly your name, post office, county and state, every time you write, and also give your shipping address if it is different from your post office address. Be particular to state how stock is to be shipped, whether by mail, express or freight. Unless otherwise requested, I shall ship by express. All orders will be promptly acknowledged and notice will be sent when goods are shipped except where forwarded at once by mail.

PRICES in this catalogue abrogate all previous quotations. The prices quoted are for the quantities specified, but six, fifty or five hundred of a variety will be supplied at dozen, hundred and thousand rates respectively. Hundred lots cannot be made up at hundred rates of less than fifty of a variety, and thousand lots cannot be made up at thousand rates of less than five hundred of a variety.

TERMS OF PAYMENT. Invariably, cash in advance. Money may be sent by whatever method is most convenient.

GUARANTEE. I warrant my stock true to name, with the explicit understanding that should any prove untrue, I will refund the money paid or replace it with other stock; but I am not liable for damage beyond this.

SHIPPING. I deliver all goods to forwarders without charge, after which my control ceases, consequently my responsibility ceases also. Transportation charges on all goods shipped by freight or express are to be paid by the purchaser.

PACKING. All shipments will be carefully packed and packages will be as light as is consistent with good packing. No extra charge is made for boxing and packing.

NEW PLANTS. All strawberry plants are freshly dug from new buds.

C. O. D. ORDERS. No stock will be sent C. O. D.

SUBSTITUTION. It is my custom, should the supply of any variety become exhausted (which will occasionally occur in all establishments), to substitute in its stead a similar sort. When it is desired that I shall not do this, it must be so stated in the order. To simply affix the words "No Substitution" is all that is necessary.

LARGE ORDERS. On large orders I can quote lower prices than those given in this catalogue. Submit list of what you want, and I will promptly quote prices.

VARIETIES NOT LISTED. If you want any varieties of stock not listed in this catalogue, I can get them for you at reasonable prices.

CLAIMS, if any, must be made upon receipt of goods, when they will be carefully and cheerfully examined, and, if just, all made satisfactory. Claims made after ten days from receipt of goods will not be entertained.

REFERENCE. Center Moriches Bank, Center Moriches, N. Y.

STRAWBERRY CULTURE

Strawberries give the greatest yield and the largest berries when grown in rich, well-manured soil; hence no pains should be spared in preparing the bed carefully before planting, by digging or plowing deeply and turning under a liberal coating of well-rotted stable manure. Harrow or rake down finely, and if at this time a top dressing of ground bone can be applied, it will be found a great benefit at fruiting time. Before planting the roots of the plants should be shortened about one-third, which will cause them to send out a profusion of new fibers. In planting expose the plants as little as possible to the wind or sun. Do not plant very deeply, but be sure to press the soil firmly about the roots. For hill culture in the family garden, set in rows two feet apart and the plants fifteen inches apart in the rows, cutting off all runners as they appear. For field culture, where they can be worked by horse and cultivator and permitted to form matted rows, plant in rows three or four feet apart with the plants from twelve to eighteen inches apart in the rows. If set in rows three feet apart with the plants one foot apart in the rows, an acre will require 14,520 plants. If set in rows three and a half feet apart with plants fifteen inches apart in the rows, an acre will require 9,953 plants.

The after culture consists in keeping the soil mellow and free from weeds by frequent hoeing or cultivation. At the approach of winter cover the entire bed with salt-meadow hay or other loose light material. When the plants "start" in the spring, rake the mulch from off the plants sufficiently to permit them to push through it, and leave it on the surface about the plants, to protect the fruit and keep it clean and also keep the soil moist and cool.

The blossoms of all strawberries in cultivation are either hermaphrodite (perfect) or pistillate (imperfect). When planting varieties having imperfect blossoms, every fourth row should be planted with a perfect flowering variety.

It is best always to plant at least three varieties,—early, medium and late,—to expand the season of fruiting to its full limits. Then by planting some of the Ever-bearing or Fall-bearing varieties, the fruiting season can be made to continue throughout the entire summer and fall.

STRAWBERRIES FOR PROFIT

There are thousands of strawberry growers who recognize that industry as their vocation. It is a proven fact that the professional berry grower is making more money to-day than any farmer who depends on the ordinary farm crop for his entire earnings. Acreage considered, the berry grower has the best of the argument from start to finish. The investment which produces a \$5,000 strawberry crop is but a small per cent. of the investment needed to produce \$5,000 worth of wheat, garden truck or potatoes. Strawberry growing has not only become a great business, but a profitable one. Thousands of acres are under strawberry cultivation, and thousands of people are employed in growing, harvesting and caring for the crops which find their way, not only into the largest cities, but into every small

city and town throughout the country. While this industry is growing, the cities and towns are growing equally—even faster—therefore there is an increasing demand for good berries. The outlook for the strawberry grower was never better. He is dealing in a staple commodity that is, year after year, becoming more and more a world necessity. In this connection read the following articles taken from Green's Fruit Grower, The Rural New Yorker and the New York Herald:

WHAT IS THE YIELD OF A STRAWBERRY BED?

In the garden at Rochester, N. Y., I have a Corsican strawberry bed 25 feet wide by 50 feet long. This is the third crop of berries that this bed has produced.

Though this has been a poor season for strawberries on account of the extreme coldness of June, which was exceptional, and to drought later, we picked from this bed 200 quarts of strawberries. The average price for strawberries here this season was 12 cents. There were only one or two days when the price fell considerably lower. The bulk of the crop has sold here at 15 cents per quart.

At 12 cents per quart this little garden patch of strawberries would yield \$24.00. Here is a suggestion for the poor man who has a garden connected with his home in the country near the city or wherever his home may be located. By having a bed or small plantation of strawberries he can realize considerable ready money. His children can pick the berries and he should find no difficulty in marketing them in the city or nearby villages or even among farmers. If he starts with a bed no larger than my own, which is intended simply to supply my own table and some of my neighbors, he will find \$24.00 jingling in his pocket that he otherwise would not have. But if this small bed of strawberries proves profitable he will doubtless increase it. If this poor man has a few rows of red or black raspberries in his garden or a row of blackberries, they also will bring in handy money, and the work of caring for them can be done at odd hours or on days when he is not otherwise engaged.

If this imaginary man finds all of these fruits profitable he will probably be inclined later to plant a few cherry, pear, plum and quince trees around the borders of his little place. When he has done this he has made his little home twice as attractive as it was before and far more profitable. Aside from this should he decide to sell this little place he will find that it will sell for far more money than it would without these delightful fruits growing upon it. At Green's Fruit Farm we sell annually a big lot of strawberries, our main drawback being to get pickers.—*Green's Fruit Grower*.

INTENSIVE BERRY CULTURE

We are busy harvesting a two-thirds crop of strawberries, about 8,000 quarts on two acres; but prices are good. The first 3,000 quarts sold for from 16 to 20 cents per quart; now selling from 11 to 12½ cents. I shall not complain, as I raised 1,000 bushels of onions last season between the rows of strawberries, which were set last spring. I also sold 100,000 strawberry plants this spring at \$4.00 per 1,000. I shall finish picking strawberries by the middle of first week in July, shall plow and plant shell and butter beans. I am practically sure of a crop of butter beans, but the shell beans possibly may be cut by a frost. I shall take my chances, as very late beans generally sell for a good price, and land is quite high and escapes most of the early frosts. You see we have to work the land for all it is worth. I shall sow clover seed about the first of September at the last cultivating of the beans to plow under next spring.—*B. King, Middlesex Co., Mass., in Rural New Yorker*.

A FARM THAT RAISES 3,000 BUSHELS OF STRAWBERRIES YEARLY

After 30 years of experience in raising strawberries, George W. Spaulding, of Somerset County, Maine, has found that this is one of the best crops that can be raised, even for the ordinary farmer. He has established an industry in this line and has proved that though a farmer may live twenty-five miles from a market, yet he can make this branch of farming successful. He employs through the summer as many people as any industry in the community where he lives.

Mr. Spaulding's idea is that in order to make a profit in any line, whether farming or some other business, one must do it on a large scale, for he claims that one had better expend his whole energy on something that will bring him an appreciable profit at the end of the year, than to put his whole time into a much smaller work and get much smaller returns.

Thirty years ago Mr. Spaulding, then a young man, lived with his parents upon a farm of ordinary soil with the same conditions to contend with that most New England farmers have. He conceived the idea of growing vegetables for the market, and for many years raised about 3,000 heads of cabbages besides large quantities of dandelion greens. He found these profitable, but he was not satisfied and began to raise raspberries. These too, proved profitable, but still he was in for doing something bigger. He then set out an acre of strawberries, and from this acre have grown the six acres that he now plans to have each year. He harvested four acres this year, and though this year did not produce the usual yield, he found the crop to be profitable. Through the summer months he employs about twenty-five hands to do the picking.

One would have the impression that marketing facilities would be hard for a fruit grower living twenty-five miles from a market of any great size. Mr. Spaulding overcomes this in various ways. He has secured a market for a large amount of his crop among the summer resorts, shipping by crate the berries over stage routes, in some instances about fifty miles. He finds no difficulty in this direction. He has a man take some of his crop to some of the smaller cities, and when the field is in its ripest stage he engages a refrigerator car, shipping a carload to the Boston markets. He says there is always a market for his berries. He realizes in an ordinary year about four dollars per bushel, and an acre will yield him a profit of between \$400.00 and \$500.00.

Raising strawberries thirty years has given a man experience to make his methods interesting to other growers. Mr. Spaulding plows his ground as he would for any other crop. He does this in the fall in order to give the weeds a chance to kill out during the winter months. In the spring of the year he harrows his ground thoroughly, making this one of the chief points in raising strawberries. He puts about half a ton of phosphate to the acre, and in setting out his plants he chooses the two varieties known as the pistillate and the stamine. He sets about three rows of pistillates to one row of stamines, the latter being the fertilizing plant.

In caring for the plants he uses a cultivator freely, about the same as he would if he were caring for corn. He keeps this up until the frosts come in the fall and then leaves them until winter. He advocates putting a good coat of straw upon the plants to keep them from being killed out by the winter and spring ice. He does no more to the crop until the berries are ripe and then he engages his pickers, people that he can depend upon.—*Green's Fruit Grower*.

STRAWBERRY CROP WORTH \$116,232

Growers in Warren County, Ky., Sold 160 Carloads During the Last Season
(Special Despatch to the Herald.)

Bowling Green, Ky., Saturday, Nov. 15, 1913.—The Warren County Strawberry Growers' Association, which has a membership of three hundred, is said to be the largest growers of strawberries in the world. Hubert D. Graham, general manager of the association, last season shipped 155 carloads of berries by freight and five by express to Cincinnati, Columbus, Dayton, Cleveland, Toledo, Akron, Alliance, Youngstown, Springfield, Ohio; Buffalo and Rochester, N. Y.; Detroit, Mich.; Pittsburgh, Pa.; Milwaukee, Chicago and many other places.

In 1910 the members of the association planted sixty acres in berries. They sold for \$34,251.58, while in 1913 the receipts were \$116,232.99. The amount of acreage was one-third less during the season of 1913 than it was in 1912 on account of the drouth, but the prices of berries were better.

Those who have the largest number of acres in berries are J. H. Clagett and R. Wells Covington, thirty-seven acres; Joseph B. Sumpter, twenty-five acres; Lawrence B. Graham, twenty-three acres; J. B. Graham, twenty acres; Morton B. Alexander and James E. Davis, twelve acres each; Dr. F. M. Mutchler and H. H. Cherry, twenty acres, and Morgan O. Hughes, ten acres. It is expected that 1,800 acres will be put in berries during the season of 1915. The shipping season in carloads begins about May 15, and lasts about five weeks.—*New York Herald*.

F. W. WELLS WHOLESALE NURSERIES **F. W. Wells, Proprietor**

Dansville, N. Y., Nov. 1, 1913.

Mr. Harry L. Squires, Remsenburg, N. Y.,

Dear Sir:—I am very glad to say that the strawberry plants received from you have proved entirely satisfactory, and the way you have handled my business is a credit to any grower. Trusting I may be able to send you considerable business in the future, I am,

Very truly yours,

F. W. Wells.

Milford, N. H.

Mr. Harry L. Squires, Remsenburg, N. Y.,

Dear Sir:—Received the strawberry plants and they are all right.

Respectfully yours, Mrs. John Mitchell.

Schulerville, N. Y.

Mr. Harry L. Squires, Good Ground, N. Y.,

Dear Sir:—I received your strawberry plants in fine order, and am very much pleased with same. I bought some plants from two other firms, paying more money for same, some of which I had to throw away. If you have any plants for sale another year, I wish you would write me a little earlier, as I am intending to set out about two acres. Have you any cabbage and celery plants? If so, quote me prices on 10,000 lots.

Yours very truly,

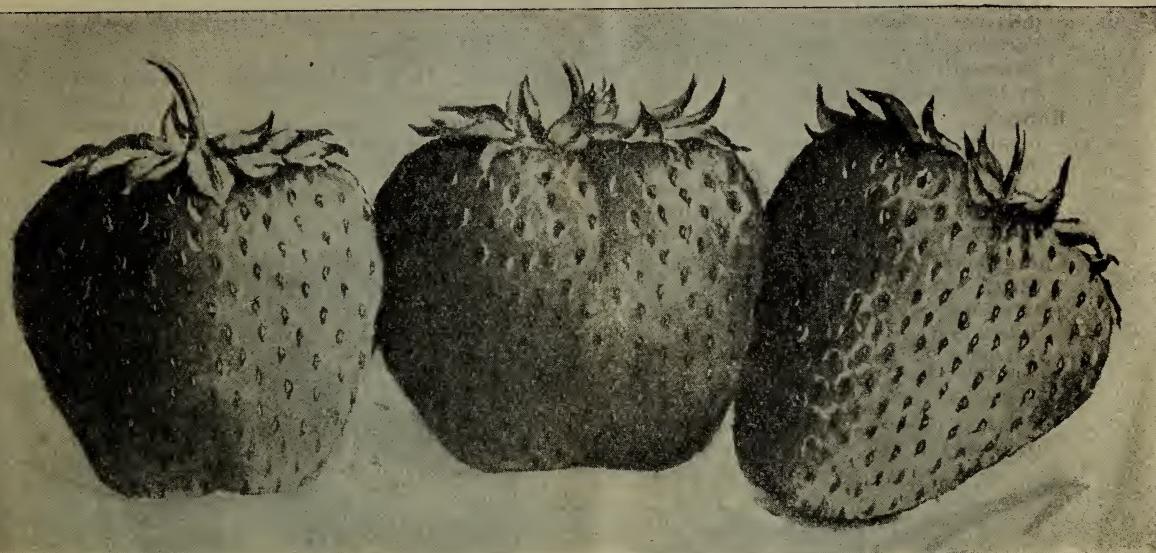

William S. Deyce.

Berry Plants

STRAWBERRIES

CLIMAX

GLEN MARY

GANDY

Varieties marked (Per.) have perfect blossoms and those marked (Imp.) have imperfect blossoms.

Fifty plants of a variety will be sent at hundred rates and five hundred of a variety at thousand rates.

RYCKMAN

(For illustration of Ryckman, see cover page.)

15 Berries to the Quart—\$500.00 From Half an Acre

That is the Record of the RYCKMAN STRAWBERRY Under Ordinary Farm Cultivation.

The Ryckman Strawberry is not a novelty or experiment, but has been extensively grown for several years, and wherever it is known there is a large and rapidly increasing demand for both the berries and plants.

It bears a tremendous crop of the very largest-sized berries, and is probably the sweetest and best flavored variety grown. In growth it is extremely vigorous, even on poor soils, and it is noted for bearing heavy crops continuously on the same ground for several years. It is perfect flowering and medium early. Farmers everywhere will find little difficulty in marketing at a good, big price the berries from an acre or more of Ryckman, for there is an unlimited demand for very large, sweet strawberries. Although it is such a heavy bearer, the Ryckman produces its entire crop in a few days, thus requiring but little time to harvest and sell

the berries. Few, if any, farm crops will net the farmer as much money as an acre or more of Ryckman Strawberries.

By express, 70c per 100; \$4.00 per 1,000; \$19.00 for 5,000; by mail, postpaid, 95c per 100.

Aroma. (Per.)—Among the best of the late ripening varieties. This is the one variety that comes nearer suited to all localities than any other variety grown with the exception of the Ryckman, and it is planted extensively both North and South. Berries are firm, solid and not easily bruised, and there is no other variety that will stand shipping long distances better than the Aroma. Much like the Gandy, in size and time of ripening, but of much better quality. Color dark red all the way through. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Bethel. (Per.)—Mid-season. Originated in Kent County, Delaware. It is described as of immense size, fine shipping qualities, dark red clear to the center, and flavor unsurpassed. A heavy cropper, covering a long bearing season, commencing medium early. The vine is a strong, upright grower, free from rust. I have not yet fruited it. By express, hundred, 60c;

thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Brandywine. (Per.)—Medium late. An old and very popular variety of general adaptability. The berries are very large, dark red to the center, firm and of good flavor. Plant of vigorous growth and very productive. This is one of the very best varieties. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Bubach. (Imp.)—Mid-season. An old reliable variety, too well known to need describing. Very large, very productive, and generally one of the best. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Chesapeake. (Per.)—Late. One of the very best late varieties. It is being extensively grown all over the United States and giving satisfaction everywhere. It ripens at about the same time as the Gandy, beginning three or four days earlier. As compared with the Gandy, it is larger, just as firm, of better quality and without the green tips. The berries

CHESAPEAKE

are uniform in size and of extra fine flavor. By express, hundred, 75c; thousand, \$4.50; five thousand, \$21.00; by mail, hundred, \$1.00.

Climax. (Per.)—Early. A very large early berry and very productive. Has an extra good flavor and is especially noted for its beauty. It is a dark red, having a glossy surface, and always draws attention on the market so that it brings the highest prices. Has excellent shipping qualities. By express, hundred, 60c; thousand,

\$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Corsican. (Per.)—Mid-season. A very large, very productive and fine flavored variety, and a heavy yielder. One of the best. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Crescent. (Imp.)—Mid-season. An old and well known variety. It is a heavy bearer of fruit of medium size. Close grained surface and solid flesh, features that make it a good shipper. Juicy and of good flavor. By express, hundred, 60c; thousand,

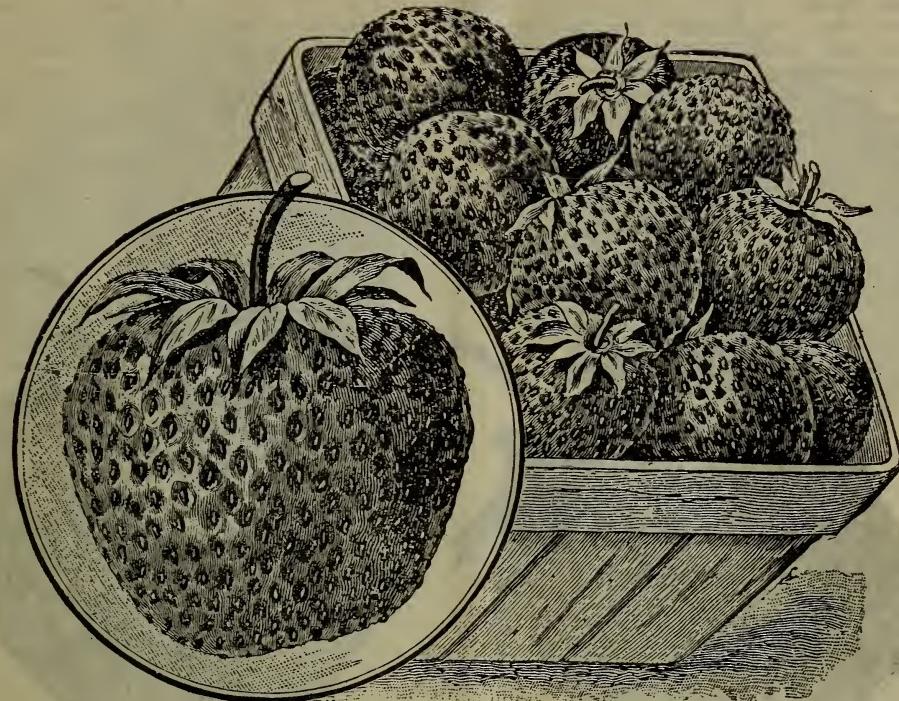

NEW YORK

\$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Early Ozark. (Per.)—Early. A very thrifty grower, with large, dark green, leathery leaf. It is as early as Excelsior or the extremely early but small Michel's Early, and almost as large as Gandy or any of the other fine late varieties. Berries are almost round and bright red in color. Plant of extremely strong growth and never rusts or scalds. In addition to all the above, and above all, the variety is enormously prolific. By express, hundred, 75c; thousand, \$4.25; five thousand, \$20.00; by mail, hundred, \$1.00.

Excelsior. (Per.)—Early. A very early berry, noted for its productiveness and its ability to stand drought and heat. It is extensively grown for market purposes. Express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Fendall. (Imp.)—Mid-season to very late. This is a seedling of the Wm. Belt, one of the most popular berries grown. It surpasses the Wm. Belt in size, flavor, beauty and uniformity. It also gives a longer season of fruit and produces nearly double

KLONDIKE

the quantity of quarts per acre. This is, indeed, claiming a great deal, yet not too much. It has yielded at the rate of nearly seventeen thousand quarts per acre. Berries are smooth, glossy, firm and exceedingly rich in flavor. Plant of strong growth, with great power to resist drought. By express, hundred, 75c; thousand, \$4.25; five thousand, \$20.00; by mail, hundred, \$1.00.

Gandy. (Per.)—Late. A very large variety and more extensively grown than any other variety. It has more than ordinary firmness and as a shipper has no superior. It is very large and bright red. Produces more berries the second year of fruiting than the first. Gandy berries during the summer of 1913 sold, all during their season in the New York City markets, at from 15c to 23c per quart. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Glen Mary. (Per.)—Mid-season to late. Both berry and plant are very large. The demand for this variety grows rapidly each year. It is a very heavy yielder of juicy, rich and highly flavored fruit. As a shipper it takes first rank, and for this reason it is extensively grown by professional berry growers who ship their fruit long distances. Another element of popularity is the fact that its roots are long and bring up moisture from great depths below the surface, thus making it

an ideal variety for dry seasons and localities where the rainfall is limited. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Golden Gate. (Per.)—Mid-season. An enormously large berry of the Marshall type, deep crimson, beautiful, firm and of high quality. Far more productive than Marshall. Of vigorous growth and resists drought better than most varieties. Awarded first premium by the Massachusetts Horticultural Society. Seven selected berries of this variety have filled a quart basket. By express, hundred, 75c; thousand, \$4.50; five thousand, \$21.00; by mail, hundred, \$1.00.

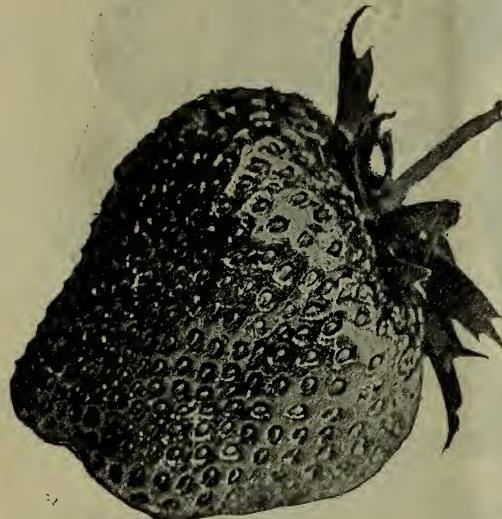

Haverland. (Imp.)—Mid-season. This is an old and well known variety that has been tested for many years, and is just as popular to-day as it ever was. The plant is large, a strong grower, entirely free from rust and disease, and bears enormous crops of very large bright red berries. It is everywhere considered to be a very profitable berry. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Heritage. (Per.)—Mid-season. A very large berry, bright crimson, very firm and of good quality. Thrifty in growth and unusually productive. Has a very long fruiting season. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

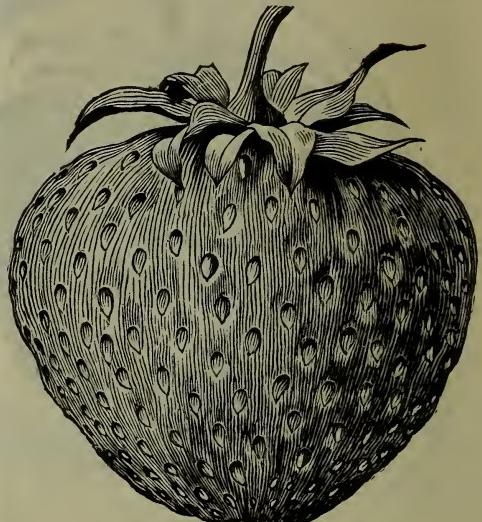

Helen Davis. (Per.)—Early to late. This berry has an unusually long fruiting season, and yields enormous crops of very large berries, many of them averaging as large as medium sized hen's eggs. Berries are large in size until the last picking. A very popular variety and one of the best. By express, hundred, 75c; thousand, \$4.25; five thousand, \$21.00; by mail, hundred, \$1.00.

flavor. It is extensively grown throughout the South and is becoming very popular in the North also. It is very productive, a thrifty grower, and resists drought well. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Marshall. (Per.)—Mid-season. One of the most popular berries grown. Extremely large and of exceptionally good flavor.

BRANDYWINE

SAMPLE]

EARLY OZARK

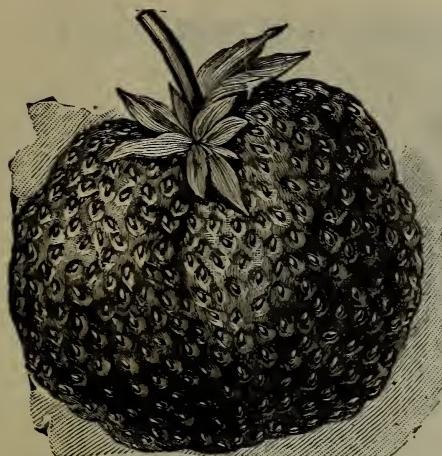

Klondike. (Per.)—Medium early. One of the most extensively grown early berries. Especially valuable for a market berry. Its firmness makes it a good shipper, and it is uniform in size from early in the season to the last picking, there being no small berries. Not large, but of good size at all times. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

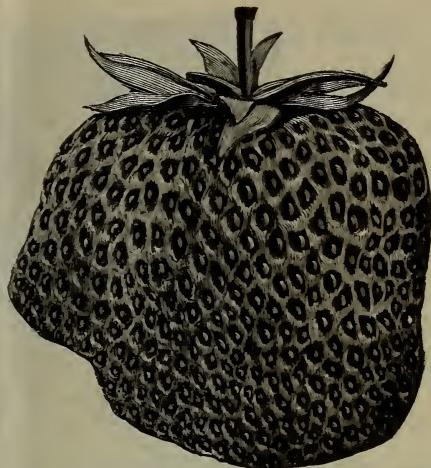

Lady Thompson. (Per.)—Mid-season. Of medium early size, and deliciously rich in

Not as productive as some other varieties, but its very large size makes it a very profitable variety. By express, hundred, 75c; thousand, \$4.50; five thousand, \$22.00; by mail, hundred, \$1.00.

Michel's Early. (Per.)—Very early. An old and popular berry, of medium size and good flavor. Its extreme earliness and good shipping qualities make it a valuable variety. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

WILLIAM'S BELT

STEVENS' LATE CHAMPION

Missionary. (Per.)—Early. A very popular Southern variety. Berries medium large, very firm and one of the best for long distance shipping. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

New York. (Per.)—Mid-season. A very large variety, thrifty in growth and very productive. It is very rich in flavor, but not as firm as many others. Very profitable for nearby markets, because of its great size and excellent flavor. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Nick Ohmer. (Per.)—Late. One of the most popular varieties. Very large, firm, and attractive. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Norwood. (Per.)—Mid-season. One of the very largest strawberries grown and believed by many to be the best. It is a good shipper and has a long fruiting season. Berries bright red and of good quality. This is the famous variety that produced four berries to the quart in Massachusetts. I consider the Ryckman its superior in size and productiveness. By express, hundred, 75c; thousand, \$4.50; five thousand, \$22.00; by mail, hundred, \$1.00.

Pineapple. (Per.)—Mid-season. A delicious variety, having the true strawberry flavor mingled with that of the pineapple. Its pineapple character is so pronounced that it is readily detected in its odor as well as its flavor. It is very large, firm and a good cropper. Especially noticeable for its beauty. Valuable alike for home or market. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Parson's Beauty. (Per.)—Mid-season. A medium large berry of especially good

flavor and a heavy cropper. It is very popular and grows well in all kinds of soil and climate. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

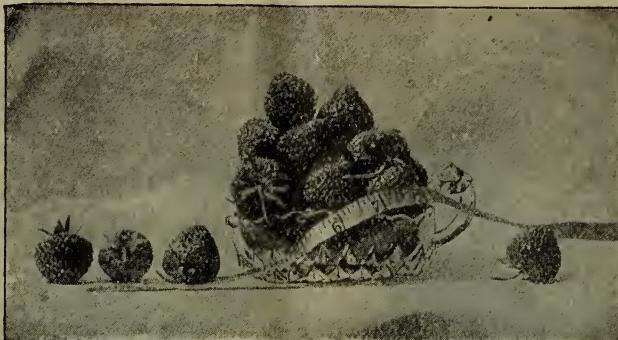

Pride of Michigan. (Per.)—Mid-season. A very large and productive berry, sweet and of excellent flavor. Very thrifty in growth. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Sample. (Imp.)—Medium late. One of the most reliable and profitable commercial berries grown. It is credited with having produced 500 bushels to the acre, two years in succession. This variety grows vigorously on all kinds of soil, and produces a heavy yield of very large, firm, juicy, fine flavored berries. As a shipper it has few equals. One of the very best. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Senator Dunlap. (Per.)—Mid-season. One of the most extensively grown varieties in the country and raised in all parts of the same. There is more demand for plants of this variety than any other at the present time. It is especially noted for being a very heavy bearer, very vigorous in growth, long fruiting season, and for being able to resist drought. Firm and a good shipper. One of the most profitable. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Sharpless. (Per.)—Late. An old favorite, but still very popular. Very large and sweet, and especially valuable for the home garden. By express, hundred, 75c; thousand, \$4.50; five thousand, \$22.00; by mail, hundred, \$1.00.

Stevens' Late Champion. (Per.)—Late. A descendant of the Gandy, but far superior to it. It will produce twice as

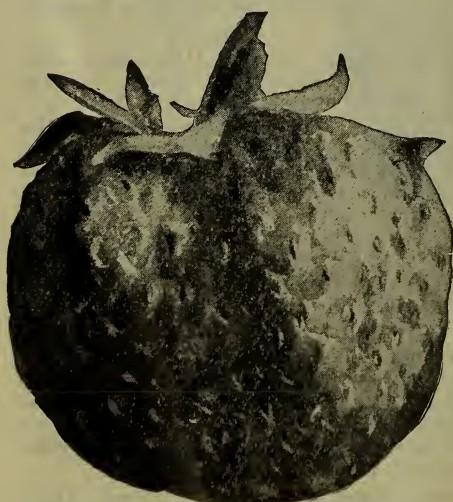

AROMA

many berries as the Gandy, and is of better quality. A very handsome berry and does well on all kinds of soil. I began picking Stevens' Late Champion last summer, the same day that I finished picking the mid-season varieties, and it lasted for a long time afterward. Because of its large size, great productiveness, lateness and beauty, it is one of the most profitable varieties grown. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

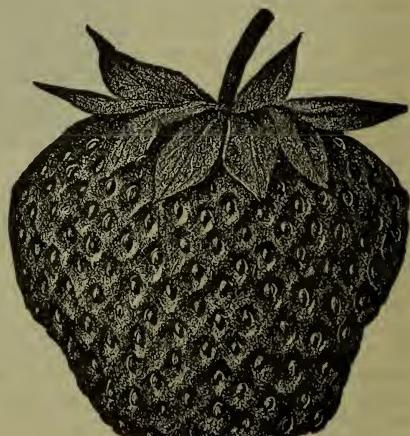

Three W's. (Per.)—Mid-season to late. A variety that is rapidly gaining in popularity in all parts of the country. It bears a heavy crop of large, beautiful berries from mid-season to very late, and is one of sweetest berries grown. It is so firm that it is considered by many to be the best shipper grown. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

Uncle Jim. (Per.)—Mid-season. Very similar to Pride of Michigan and New York. Large, productive and fine flavored. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

William Belt. (Per.)—Mid-season. One of the very finest berries and considered by many to be the best grown in the United States. The plant is vigorous, succeeds upon all kinds of soil, and invariably yields very heavily. The berries are always of large size and high quality. It begins to ripen quite early and continues until almost the close of the season, the last berries being large and full flavored. It is firm and a good shipper, and gives large pickings for a longer period than most varieties. By express, hundred, 60c; thousand, \$3.75; five thousand, \$17.50; by mail, hundred, 90c.

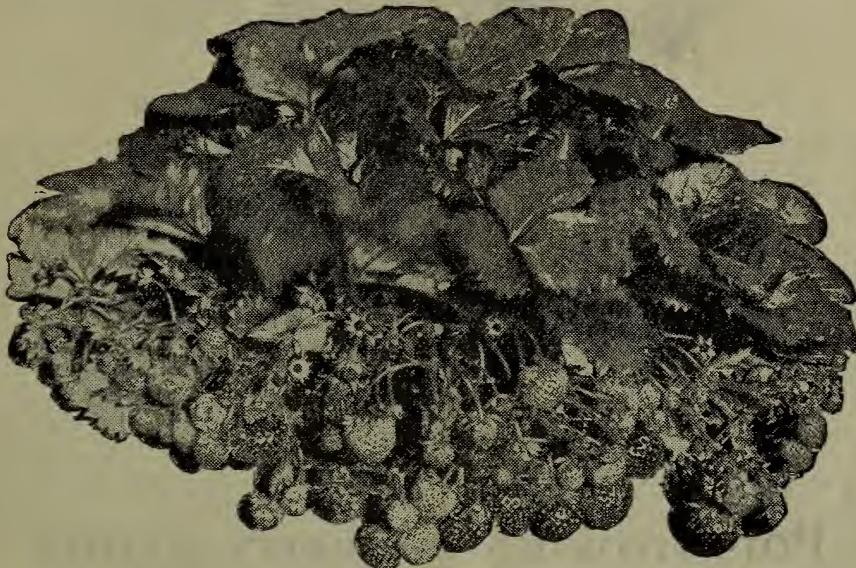

BUBACH

SENATOR DUNLAP

Fall, or Everbearing Strawberries

Lovers of strawberries are delighted to know that they can now have this favorite fruit five or six months in the year, instead of one, as in days gone by. Fall-bearing plants set in the spring will yield a good crop in the fall, again the next June, and still again the second fall, making three crops in two years instead of one. When the plants are set in the spring the blossoms should be kept off until the middle or last of July to allow the plants to become strong and well established. There will be ripe fruit in about four weeks from the time you stop cutting off the blossoms, and right along after that until the ground freezes up for winter.

PRODUCTIVE

Americus. (Per.)—This variety has been before the public long enough to become quite well known, and does not need to be described at great length. It is a vigorous grower, a good plant maker and a generous yielder. Its fruit is of fair size and delicious in flavor. The runner plants begin to blossom even before they take root and continue in bearing as long as the weather permits. By express, twelve, 90c; hundred, \$4.00; thousand, \$35.00; by mail, twelve, \$1.00; hundred, \$4.30.

Pan-American. (Per.)—Similar to Americus, but not so large and not so good a plant-maker. By express, twelve, 90c; hundred, \$4.00; thousand, \$35.00; by mail, twelve, \$1.00; hundred, \$4.30.

Productive. (Imp.)—This variety produces large plants, makes plenty of runners, fruits considerably on new runner plants, and produces a large crop of good-sized, light red berries. It is firm and a good shipper. One of the best of the fall bearers. By express, twelve, 90c; hundred, \$4.00; thousand, \$35.00; by mail, twelve, \$1.00; hundred, \$4.30.

Progressive. (Per.)—Generally considered the best of the fall bearers in every way. By express, twelve, \$1.25; hundred, \$6.00; thousand, \$45.00; by mail, twelve, \$1.35; hundred, \$6.30.

Superb. — Similar to Americus and Productive. By express, twelve, 90c; hundred, \$4.00; thousand, \$35.00; by mail, twelve, \$1.00; hundred, \$4.30.

Summer and Fall Strawberry Plants

For Shipment During August, September, October and November

During these months I can supply strong, well-rooted strawberry plants of all varieties listed, at the prices given below. These are young, vigorous plants, grown from beds set in the spring.

Prices During August

By express, hundred, 95c; thousand, \$5.00; five thousand, \$23.00; by mail, hundred, \$1.25.

Prices During September, October and November

By express, hundred, 80c; thousand, \$4.75; five thousand, \$22.00; by mail, hundred, \$1.10.

Fall-Bearing Varieties—From August 1st to December 1st

By express, twelve, \$1.25; hundred, \$6.50; thousand, \$45.00; by mail, twelve, \$1.35; hundred, \$6.80.

POT-GROWN STRAWBERRY PLANT

❖ Pot-Grown Strawberry Plants ❖

For Shipment During July, August, September, October and November

During these months I can supply first class pot-grown strawberry plants of the varieties and at the prices named below. These plants have a large mass of roots and are shipped with the earth on them, just as they grow in the pots. They will reach you in a growing condition and can be safely transplanted at any time, even in very dry weather. They will produce a full crop of fruit the next summer.

June-Bearing Varieties: Chesapeake, Climax, Early Ozark, Glen Mary, New York, Sample, Senator Dunlap, Stevens' Late Champion and William Belt.

By express, twenty-five, \$1.25; hundred, \$2.90; thousand, \$25.00.

Fall-Bearing Varieties: Americus, Pan-American, Productive, Progressive and Superb.
By express, twelve, \$1.50; hundred, \$8.00.

Maysville, Ky., Aug. 15, 1913.

Mr. H. L. Squires, Remsenburg, N. Y.,

Dear Sir:—I received the pot-grown Ryckman strawberry plants in fine condition and
they are looking well.

Very truly, J. A. Crosby.

Westhampton Beach, N. Y., Aug., 1913.

Mr. Harry L. Squires, Good Ground, N. Y.,

Dear Sir:—The pot-grown strawberry plants arrived in good condition. My gardener
says they are fine.

Very truly, Mrs. J. K. Creevey.

McGLENNON & KIRBY CO.
Nurserymen and Horticulturists

Rochester, N. Y., Oct. 14, 1913.

Mr. Harry L. Squires, Remsenburg, N. Y.,

Dear Sir:—It is a real pleasure for us to say to you that we are entirely satisfied with
your strawberry plants and the way you pack them, and we are enjoying the natural results
of such conditions, namely, largely increased business for strawberry plants. Wishing you
continued prosperity, which we concede you merit, we remain,

Yours respectfully,

McGlenon & Kirby Co.

Raspberries

If to be sent by mail, add 40c per hundred

ST. REGIS EVERBEARING

Bears First, Last and All the Time

Raspberries for Four Months! That's what you get when you plant St. Regis—the new everbearing variety. Moreover they are not only raspberries, but raspberries of the very highest grade.

The variety has been aptly termed "the early 'till late" variety; for it is the first red raspberry to give ripe fruit, while it continues to produce berries without intermission until late in October.

St. Regis is of pure American blood and of ironclad hardihood, the canes enduring the severest cold uninjured and are wonderfully prolific. Unlike Belle de Fontenay, Henrietta,

ST. REGIS

Marvel of Four Seasons and all other so-styled everbearing red raspberries that have preceded it, (and many others that are not everbearing,) its foliage never suffers by sunburn or scald, nor is its growth of cane impaired by the heat or drought of summer.

In addition to the bright crimson color and large size of the fruit, it is so firm and rich in sugar that it will stand shipping two hundred miles, arriving at market in first class order; and it can readily be kept in perfect condition for several days after being gathered.

The merits of this truly reliable, everbearing raspberry may be summarized as follows:

1. It is the earliest of all red raspberries.
2. It is wonderfully prolific; the first, or main crop, being far greater than that of any other red variety known.
3. It gives a crop of fruit all summer and autumn, fruiting on the old canes in generous quantities until late in August. By this date, berries begin to ripen upon the young, i. e., current year's canes, which continue to produce berries in increasing numbers until late autumn; in fact, until severe frost.
4. Berries are bright crimson, of large size and of surpassing quality—rich, sugary, with full raspberry flavor. They are of exceedingly meaty, firm texture and keep in good condition longer, after being gathered, than any other red raspberry. As a shipper it is unexcelled.
5. The canes are of stocky, strong growth with a great abundance of dark green leathery leaves.
6. It succeeds upon all soils, whether light and sandy or cold heavy clay, and the canes are absolutely hardy.

Bears the First Season

St. Regis yields a crop of fruit the season it is planted. Plants of it planted in early April give ripe berries in June of the same year. For four weeks thereafter the yield is heavy and the canes continue to produce ripe fruit freely without intermission, until the middle of October. The berries are large and beautiful, firm and full flavored to the very last.

Price of Plants: \$1.25 per 25; \$2.50 per 100; \$15.00 per 1,000; \$70.00 per 5,000.

BLACK DIAMOND

Black Diamond. (Black)—A very large, early blackcap, firm and of high quality. Very hardy and said to be the sweetest of black raspberries. By express, twenty-five, 75c; hundred, \$1.75; thousand, \$10.00; five thousand, \$48.00.

Columbian. (Purple)—A very hardy variety of remarkable vigor and productiveness. Propagates from tips the same as blackcaps. Fruit large, dark red bordering on purple. Very juicy with a rich flavor of its own. It is said that an ex-minister in this state grew 17,000 quarts, in 1912, from two and one-half acres of Columbian. By express, twenty-five, \$1.00; hundred, \$2.00; thousand, \$13.00; five thousand, \$63.00.

Cumberland. (Black)—The most popular blackcap and the largest of the raspberry family. Mid-season. By express, twenty-five, \$1.00; hundred, \$2.00; thousand, \$12.00; five thousand, \$58.00.

Cuthbert. (Red)—One of the old standard reliable sorts, and the most extensively grown red variety. It is a strong grower, very productive, and bears very large, firm berries of a rich, sprightly flavor. By express, twenty-five, 75c; hundred, \$1.75; thousand, \$10.00; five thousand, \$46.00.

Golden Queen. (Yellow)—Similar to Cuthbert in every way except color, which is a clear, translucent amber. By express, twenty-five, \$1.25; hundred, \$2.50; thousand, \$16.00; five thousand, \$75.00.

Gregg. (Black)—An old reliable variety. The canes are strong and fruit attractive and of choice quality. The best late market variety. By express, twenty-five,

75c; hundred, \$2.00; thousand, \$12.00; five thousand, \$56.00.

Haymaker. (Purple)—Large, very productive, and a vigorous grower. One of the best purple raspberries. By express, twenty-five, \$1.25; hundred, \$2.75; thousand, \$16.00; five thousand, \$75.00.

Kansas. (Black)—One of the most popular blackcaps and much earlier than Gregg. Fruit very large, jet black, firm and of rich flavor. One of the best shippers. By express, twenty-five, 75c; hundred, \$1.75; thousand, \$10.00; five thousand, \$47.00.

King. (Red)—The leading red raspberry. It unites earliness, large size, bright color, firmness of flesh and good quality with productiveness, vigorous growth and hardness of cane. A good shipper and stands pre-eminent for endurance of cold in winter and the heat and drought of summer. By express, twenty-five, \$1.00; hundred, \$2.00; thousand, \$11.00; five thousand, \$50.00.

Plum Farmer. (Black)—A very large and popular early blackcap. By express, twenty-five, \$1.00; hundred, \$2.25; thousand, \$12.00; five thousand, \$55.00.

Ruby Red. (Red)—A very large, early, bright crimson variety. An enormous yielder, firm and of good flavor. By express, twenty-five, \$1.00; hundred, \$2.25; thousand, \$14.00; five thousand, \$65.00.

Wineberry (Japanese Raspberry)—Berries are of medium size, the color of sherry wine, with a brisk, pleasant, sub-acid flavor. Canes of strong growth, as hardy as an oak, and yield enormously for a long season. By express, twenty-five, \$1.75; hundred, \$3.50; thousand, \$25.00.

Blackberries

If to be sent by mail, add 50c per hundred

BLOWERS

Blowers—The leading blackberry. A large, handsome berry of superb quality. A sturdy grower, absolutely hardy, and yields very heavily for a long season, beginning in mid-season. Its canes have endured a temperature of twenty degrees below zero unharmed and it has yielded at the rate of 280 bushels per acre. By express, twenty-five, \$1.25; hundred, \$3.00; thousand, \$16.00; five thousand, \$75.00.

Early King—One of the leading early blackberries. By express, twenty-five, \$1.00; hundred, \$2.50; thousand, \$14.00; five thousand, \$65.00.

Eldorado—Especially valuable for its fine quality and hardiness. Berries are of good size, glossy, jet black, sweet and melting. By express, twenty-five, \$1.25; hundred, \$2.75; thousand, \$16.00; five thousand, \$75.00.

Erie—One of the very largest and best blackberries. By express, twenty-five, \$1.00; hundred, \$2.50; thousand, \$14.00; five thousand, \$65.00.

Iceberg—The best white blackberry yet introduced. The berries are a snowy white, sweet and tender, and borne in

large clusters very profusely. By express, twenty-five, \$1.25; hundred, \$2.75; thousand, \$17.00; five thousand, \$80.00.

Mersereau—Early to mid-season, very large and hardy. Berries jet black, luscious and firm. By express, twenty-five, \$1.25; hundred, \$2.50; thousand, \$14.00; five thousand, \$65.00.

Rathbun—Very early, large, productive, and has good keeping and shipping qualities. By express, twenty-five, \$1.25; hundred, \$2.75; thousand, \$16.00; five thousand, \$75.00.

Snyder—Berries of medium size, but borne

in great abundance, literally covering the bush with sweet and juicy fruit. Early and very hardy. By express, twenty-five, \$1.00; hundred, \$2.50; thousand, \$14.00; five thousand, \$62.50.

Ward—One of the most popular and best blackberries. Much like the once popular Kittatinny. It is a strong, vigorous grower, hardy and bears unusually heavy crops of large, handsome berries of the finest quality, which always command the highest prices in market. By express, twenty-five, \$1.00; hundred, \$2.50; thousand, \$16.00; five thousand, \$75.00.

DOWNING

Gooseberries

If to be sent by mail, add 50c per hundred

Downing—The standard market variety. A sure and heavy yielder. Berries large and pale green. By express, twelve, \$1.50; hundred, \$7.50; thousand, \$65.00.

Houghton—Very prolific. Berries red, rather small, but sweet and good. By express, twelve, \$1.35; hundred, \$6.00; thousand, \$55.00.

Red Jacket—Berries large, dull crimson, sweet and luscious. By express, twelve, \$1.50; hundred, \$7.50; thousand, \$65.00.

Currants

If to be sent by mail, add 50¢ per hundred

Black Champion—A heavy bearer, large and black. By express, twelve, \$1.25; hundred, \$6.00; thousand, \$50.00.

Cherry—Large berries, bright crimson. Sharp acid flavor. By express, twelve, \$1.00; hundred, \$4.75; thousand, \$40.00.

Fay's Prolific—Less acid than Cherry, and the leading red variety. Bunch and berry large, bright and sparkling. By express, \$1.00; hundred, \$4.50; thousand, \$40.00.

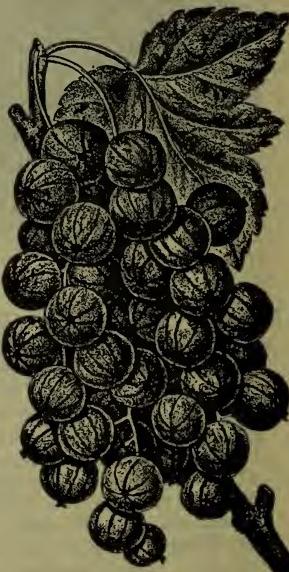

Pomona—Of good size and flavor, bright red, early and very productive. By express, twelve, \$1.00; hundred, \$4.50; thousand, \$40.00.

Red Cross—Color red. Mid-season. The most popular currant. Large, good flavored and very productive. By express, twelve, \$1.00; hundred, \$5.00; thousand, \$45.00.

Victoria—Best late variety. Berries red and of superior quality. By express, twelve, \$1.00; hundred, \$4.50; thousand, \$40.00.

White Grape—The best white currant. Bunch and berries both large. A beautiful translucent white, and of mild, superior quality. By express, twelve, \$1.25; hundred, \$5.00; thousand, \$45.00.

Wilder—One of the strongest growers and most prolific. Bunch and berry large, bright, attractive red. Hangs on bushes in fine condition for a long time. By express, twelve, \$1.00; hundred, \$4.50; thousand, \$40.00.

WILDER

Dewberries

If to be sent by mail, add 50c per hundred

Lucretia—The standard dewberry. Earlier than blackberries and as large as the largest of them. The canes are hardy and exceedingly prolific, thriving everywhere. They are of slender, trailing habit, and entirely free from disease and insect attacks. The fruit is of excellent quality, large and handsome, jet black, rich and melting. Ships well and keeps well. By

express, twenty-five, 75c; hundred, \$1.50; thousand, \$8.00; five thousand, \$35.00.

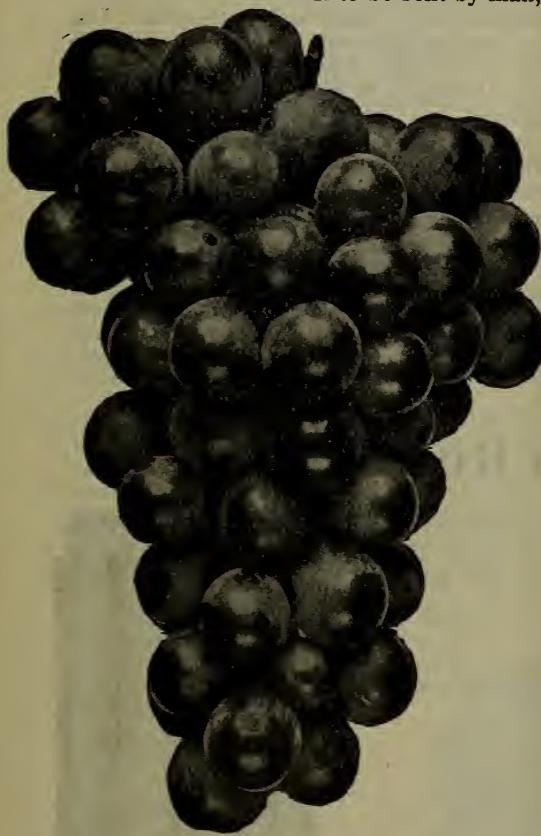

Austin's Improved—The earliest dewberry. Ripens fully a week earlier than Lucretia. Large, hardy, very productive and of excellent flavor. By express, twenty-five, 75c; hundred, \$1.50; thousand, \$8.00; five thousand, \$35.00.

Grapes

If to be sent by mail, add 60c per hundred

CONCORD

Worden—A black grape that resembles Concord, with larger bunch and berries, and ten days earlier. By express, each, 12c; twelve, 75c; hundred, \$4.00; thousand, \$30.00.

Niagara—A very popular large, white grape, thin-skinned, sweet and luscious. Mid-season. By express, each, 12c; twelve, 75c; hundred, \$4.00; thousand, \$30.00.

Wilder—A superior black grape. Bunch large, berry large, black, tender, and of superior quality. Very prolific. One of the very best. By express, each, 12c; twelve, \$1.00; hundred, \$4.50; thousand, \$35.00.

Concord—The most popular black variety. Large clusters and large berries. Delicious flavor. Succeeds everywhere. Mid-season. By express, each, 12c; twelve, 75c; hundred, \$3.00; thousand, \$22.00.

Diamond (Moore's)—The most reliable white grape. Bunches and berries large, greenish white, juicy and of good quality. Ripens early. By express, each, 12c; twelve, 75c; hundred, \$4.00; thousand, \$30.00.

Eaton—The largest black grape. Bunch and berry of great size. Early, very prolific and of good quality. By express, each, 12c; twelve, \$2.00; hundred, \$12.00.

Moore's Early—A reliable, early black grape. Medium bunch, berry large and jet black. Two weeks earlier than Concord. By express, each, 12c; twelve, 75c; hundred, \$4.00; thousand, \$30.00.

Mr. Harry L. Squires, Remsenburg, N. Y.,

Dear Sir:—Grape vines received O. K. and planted.

Groton, Mass.

Yours truly, J. S. Rowell.

Waterford, Conn., Sept. 16, 1913.

Mr. Harry L. Squires, Good Ground, N. Y.,

Dear Sir:—Received the strawberry plants O. K. Well satisfied with them.

Yours truly, H. E. Beckwith.

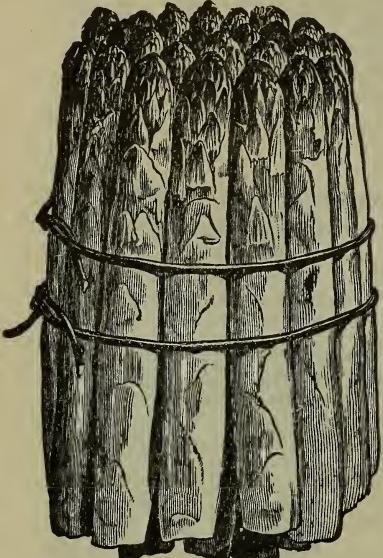

Asparagus Plants

If to be sent by mail, add 60c per hundred

This is one of the most profitable crops grown, and is considered by far the choicest of all early spring vegetables. It is ready for market very early in the spring, and can be cut for several months if desired.

ASPARAGUS

A field well planted will last for a lifetime. It is in great demand in all markets, selling at very fancy prices, and the demand for it is growing faster than the supply. Asparagus growing is still in its infancy, as it is being planted only in a limited way and in but few localities. Its culture is very simple. For the home garden set the plants from one to two feet apart in rows three feet apart. For field culture set the plants two feet apart in rows four to six feet apart. Plant about five inches below the surface and cover with two inches of earth, filling in the balance to a level by degrees during the summer.

Barr's Mammoth—Very large and productive. One-year-old, by express, hundred, 60c; thousand, \$3.25; five thousand, \$15.00. Two-year-old, by express, hundred, 75c; thousand, \$4.50; five thousand, \$20.00.

Conover's Colossal—An old variety, well-known everywhere. It is of large size, rapid in growth and of good quality. Prices same as for Barr's Mammoth.

Giant Argenteuil—Finest and most profitable. Stalks of immense size, rich and tender. Earlier than the other varieties. Free from rust and blight. Prices same as for Barr's Mammoth.

Palmetto—This has long been the most popular kind and most extensively planted. It is much like Giant Argenteuil, but perhaps not quite so large; still it is very large. [Prices same as for Barr's Mammoth.

Rhubarb Roots

Sometimes called Wine Plant or Pie Plant. Plant in rows four feet apart, with the plants three feet apart in the rows. Set so that the crowns are about one inch below the surface.

Myatt's Linnaeus—Most popular and the best for general use. Early, very large, productive, tender, and very delicately flavored. Requires less sugar than the other sorts. By express, twelve, 75c; hundred, \$4.00; thousand, \$25.00.

Victoria—Same prices as for Myatt's Linnaeus.

Horseradish Roots

If to be sent by mail, add 50c per hundred

Of the easiest culture. Plant the roots in moist, rich soil, small end down, with the top an inch below the surface.

Common or English—The well known sort; the one in common use. By express, twelve, 35c; hundred, 80c; thousand, \$4.50; five thousand, \$20.00.

Bohemian or Maliner-Kren—Of very strong growth. Cuttings planted in April produce fine large roots for grating the first of October. It is as white as snow when dressed. Grows to great size if left in the ground until spring, and yields as much as four tons to the acre. By express, twelve, 40c; hundred, \$1.00; thousand, [\$6.50; five thousand, \$30.00.

SUMMER

Early Harvest—Medium to large, pale yellow, mild and excellent; very productive. August.

Red Astrachan—Large and handsome, crimson, rather acid. A good grower and very hardy. August.

Golden Sweet—Large, pale yellow, a good grower and very productive. August.

Yellow Transparent—Medium yellow, tender and juicy; early. August.

AUTUMN

Duchess of Oldenburg—Large, striped; ten-

der, juicy, sub-acid; a good grower, regular and free bearer. September.

Gravenstein—Very large, striped, tender, rich and sub-acid. September and October.

Maiden's Blush—Large, beautiful yellow with blush cheek; fine quality and prolific. September and October.

Fall Pippin—Very large, yellow, tender and best quality. One of the best varieties for table or market. October.

Fameuse (Snow Apple)—Early, medium, deep crimson; flesh snowy white, tender, melting and delicious. November to January.

WINTER

American Blush—Unsurpassed for large size, great beauty, and excellent quality; bright red on yellowish skin; flesh yellow, aromatic and sub-acid; vigorous grower and very productive bearer every year. November to January.

Baldwin—Large, dark red, sub-acid, good flavor; very profitable. December to March.

Banana—Resembles Maiden's Blush, but larger and later; equally good. An early and abundant bearer. November to March.

Ben Davis—Large, deep red, very attractive; tender, mild and sub-acid; free grower, very prolific, good shipper and keeper. February to May.

Gano—Large, deep red, very attractive; tender, mild and sub-acid; free grower, very prolific, good shipper and keeper. February to May.

Golden Russet—Medium, russet, crisp, juicy, mild and sub-acid; very good flavor; hardy and long keeper. November to April.

Grimes' Golden—Large, golden yellow, best quality; very productive, hardy and vigorous. January to April.

Hubbardston Nonsuch—Large, striped yellow and red; tender, juicy and fine; great bearer; one of the best. November to May.

King of Tompkins County—A handsome red apple of the largest size and best quality; good grower and bearer and sells for higher prices than most other apples. November to March.

Mann—Medium to large, yellow, juicy and fine flavored; good bearer and keeper. January to April.

McIntosh Red—Large and beautiful; deep crimson and of the highest quality; hardy and a good regular bearer. November to January.

Northern Spy—Large, striped red; quality excellent; free grower and productive. December to June.

Northwestern Greening—A hardy winter apple of very large size, much larger than R. I. Greening. Highly prized in localities where the ordinary Greening will not succeed. Green, excellent quality; flesh yellowish, fine grained, tender, juicy, sub-acid.

Rhode Island Greening—Large, green, tender, rich, sub-acid; productive and very popular. December to April.

Rome Beauty—Large, yellow, shaded and striped with red; juicy, tender and sub-acid; productive. October to November.

Roxbury Russet—Medium to large, yellow russet; crisp and good; productive. January to June.

Seek-No-Further—An old favorite dessert apple. October to February.

Spitzenburg—Large, deep red with gray spots, and delicately coated with bloom; flesh yellow, crisp, rich and excellent. November to April.

Stayman's Winesap—Superior to Winesap in every way. Fruit is crisp, juicy, sprightly and aromatic; very good flavor. Vigorous, hardy, and an early and reliable annual bearer. December to April.

Talman Sweet—Medium, bright yellow, sweet, productive. November to April.

Wealthy—Medium to large, dark red; sub-acid; a free grower, productive and extra hardy. November to January.

Yellow Belleflower—Large, golden color, often with red blush; tender, crisp, juicy, sub-acid and of excellent quality. October to February.

CRAB APPLES

Hyslop—Large, deep crimson; tree vigorous and hardy; very popular. October to January.

Transcendent—A beautiful variety of the Siberian Crab; red and yellow; very hand-

some; a remarkable grower and bearer. September and October.

Whitney—One of the largest; green splashed with carmine; juicy and rich; a great bearer. August and September.

DWARF APPLES

	Each	100
3 to 4 feet.....	\$.45	\$35.00

Varieties: Baldwin, Fall Pippin, Fameuse, Gravenstein, McIntosh, Red Astrachan and Yellow Transparent.

Mr. Harry L. Squires, Good Ground, N. Y.,

Dear Sir:—Inclosed find check for berry plants. The plants reached me in very good condition. I shall no doubt want more another year and hope to give you a large order at that time.

Yours respectfully,

Hallstead, Pa.

Erwin Cole.

Pears

SECKEL

	Each	100
First Class, 5 to 7 feet, 2 year.....	\$.38	\$32.00
Medium, 4 to 5 feet, 2 year.....	.32	24.00

SUMMER

Bartlett—Well known and very popular. Large, yellow, high flavored, juicy and rich; a vigorous grower and heavy bearer. August and September.

Clapp's Favorite—Much like Bartlett, of which it is a seedling, but larger and a little earlier. August.

Wilder—Handsome, melting, sweet, pleasant; tender, juicy. Greenish yellow with brownish red cheek. August.

AUTUMN

Angouleme—Very large, greenish yellow; juicy, rich and of fine flavor; very popular. October.

Anjou—Very large, greenish yellow, buttery and melting with sprightly vinous flavor; very vigorous and productive. One of the best and most desirable. October and November.

Flemish Beauty—Large and beautiful, yellow and russet; juicy, melting, sweet.

A great bearer. September and October.

Kieffer—Large, rich golden with red cheek. Very vigorous, healthy and hardy; an early, regular and abundant bearer; best kind for canning; remarkable for its keeping and shipping qualities. October and November.

Louise Bonne—Medium to large, greenish yellow with red cheek; fine quality; vigorous grower. September and October.

Seckel—Small, yellowish brown and of highest flavor and quality; tree a good grower and productive. September and October.

Sheldon—Large, apple-shaped, green and russet; sweet, juicy and highly perfumed; vigorous, hardy and productive. October.

Worden-Seckel — A seedling of the Seckel but several times as large and superior in beauty and keeping quality. Very sweet, juicy and fine grained, and has the peculiarly pleasant aroma of the Seckel. October.

WINTER

Beurre Clairgeau—Very large, light yellow shaded with crimson and russet; an early and abundant bearer. January.

Lawrence—Medium, yellow with green dots; melting, pleasant, aromatic. November to December.

President Drouard—Large and handsome; melting, juicy, rich, with delicate perfume. February to March.

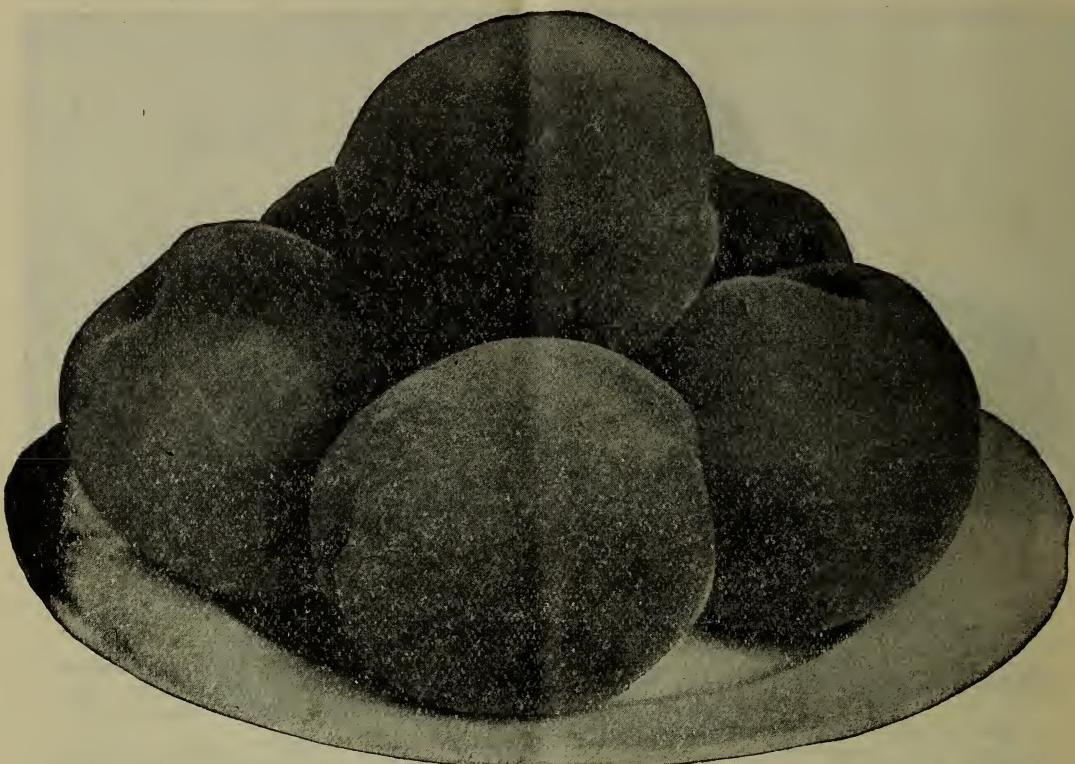

DWARF PEARS

	Each	100
3 to 4 feet.....	\$.25	\$15.00

Peaches

ELBERTA

	Each	100
First Class, 4 to 5 feet, 2 year.....	\$.18	\$11.00
Medium, 3 to 4 feet, 2 year.....	.14	9.00

Beer's Smock—Large, yellow, with red cheek; flesh yellow and of the best quality for the season; a regular and enormous bearer, making it very desirable for market purposes. September.

Belle of Georgia—Very large, white with red cheek; firm and of good quality. A rapid grower, very productive and a good shipper. Early September.

Carman—Of largest size, yellow and red, firm; strong grower and heavy bearer. August.

Champion—An early peach of ironclad hardness. Remarkable for its size and quality; creamy white with red cheek, very handsome. Last of August.

Crawford's Early—Very large, yellow and red; best quality, very productive; popular. Early September.

Crawford's Late—Similar to Early Crawford, but later and not quite so productive. Late September.

Crosby Frost-Proof Peach — The hardiest peach known. Bears regular crops north of the peach belt. Medium size, bright orange yellow splashed with carmine. Very popular. September 15th.

Elberta—The most popular peach grown. It is hardy, a sure bearer and very productive. Fruit large, yellow with red

cheek; flesh yellow, juicy and firm and of high quality. A generally successful market peach and valuable also for planting in the garden. Ripens soon after Early Crawford.

Fitzgerald—Similar to Early Crawford in season, size, color and quality, but very much harder, succeeding in Canada and Michigan perfectly. Ripens after Early Crawford.

Greensboro—A valuable early white peach. Large, prolific and of excellent quality. July.

Niagara—In appearance just like Elberta and of same size. However it is a much better peach in quality, much less subject to leaf curl and other disease, harder and about a week earlier.

Salway—One of the best and most regular bearers. Very large, creamy yellow with creamy cheek. Flesh deep yellow, juicy, rich and sweet. Early October.

Sneed—The earliest peach known. Medium, white with crimson blush; quality excellent; productive and profitable.

Triumph — Earliest yellow-fleshed peach. Firm and of good quality. A sure and abundant bearer.

Yellow St. John—Very similar to Crawford's Early, but two weeks earlier.

Plums

Medium, 4 to 5 feet, 2 year.....	.20	15.00

[BURBANK □

JAPANESE VARIETIES

Abundance—The popular plum. Large and early, of a beautiful, bright cherry color. One of the finest and handsomest growers. Very hardy and an early and abundant bearer. Middle of August.

Burbank—A vigorous grower and an abundant and early bearer. A little larger than Abundance and about two weeks later. Large, clear cherry red; flesh deep yellow, very sweet, and of a fine, aromatic flavor. One of the best and most popular. Late August.

Climax—Flesh yellow, sweet and delicious, with a pineapple fragrance. Very productive. Early August.

October Purple—Fruit large; dark maroon; fine flavor. Tree good grower and hardy. Middle of September.

Red June—Medium to large, brilliant red, good quality. Vigorous spreading tree. Early August.

Satsuma—Large, purplish red; flesh juicy, dark red. Hardy and vigorous. August.

Wickson—Large, carmine, flesh sweet and delicious. One of the largest plums grown.

EUROPEAN VARIETIES

Bradshaw—Most productive plum grown. Very large, purple, juicy and vigorous. August.

Fellemburg (French or Italian Prune)—The finest quality prune; oval, purple, juicy and delicious. Parts from stone. Fine for drying. Very productive. August.

Imperial Gage—One of the best of plums. Large, greenish, juicy and rich. Very productive. August.

Lombard—A favorite with plum growers. Medium, dull brick color, sweet and good. Remarkably productive and a valuable market variety. August.

Moore's Arctic—The hardiest of European plums. Medium, blue, juicy, sweet and pleasant. Very prolific. September.

Niagara—Of large size and fine flavor; heavy bearer and not liable to rot. Aug.

Shipper's Pride—Very productive and an excellent shipper. Large, purple and of fine quality. September.

Shropshire Damson—Medium, dark purple. An English plum of great merit for preserving. Large. Curculio proof. Oct.

Washington—This is one of the finest and most popular plums. Very large, skin yellow; very productive. Last of August.

Yellow Gage—Large, deep yellow, rich, sugary and melting. Tree vigorous and productive. Middle of August.

York State Prune—One of the largest, best in quality and most productive of all prunes. Large, dark blue, sweet and handsome; prolific and a regular bearer. Last of August.

Brooklin, Me., Sept. 24, 1913.

Mr. Harry L. Squires, Good Ground, N. Y.,

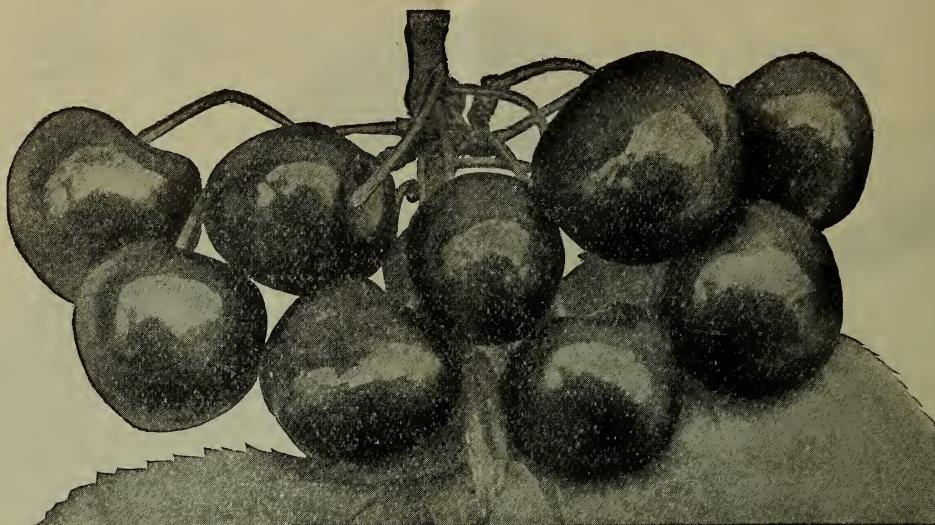

Dear Sir:—The plants arrived in excellent condition, and are now transplanted and doing fine. Please find inclosed check for \$2.38 for 500 Brandywine, to be shipped as soon as possible.

Yours very truly,

R. L. Allen.

Cherries

GOVERNOR WOOD

The Heart and Bigarreau Cherries are sweet and of larger and more robust growth than Dukes and Morellos. The growth of Dukes and Morellos is slower but much hardier; fruit sour.

SWEET CHERRIES (Hearts and Bigarreaus)

	Each	100
First Class, 5 to 7 feet, 2 year.....	\$.28	\$20.00
Medium, 4 to 5 feet, 2 year.....	.20	16.00

SOUR CHERRIES (Dukes and Morellos)

	Each	100
First Class, 5 to 6 feet, 2 year.....	\$.25	\$18.00
Medium, 4 to 5 feet, 2 year.....	.20	14.00

SWEET CHERRIES (Hearts and Bigarreaus)

Bing—One of the most delicious sweet cherries grown. Large, dark brown or black, and of very fine quality. July.

Black Ox Heart—An old variety; deep black; flesh tender, juicy, sweet. July.

Black Tartarian—Very large, juicy, rich and productive. One of the best. End of June.

Governor Wood—Large, light red; juicy, rich and delicious. End of June.

Schmidt—Very large, jet black, juicy, sweet and of fine flavor. Hardy and a good shipper. July.

Windsor—Very large, pale yellow and red; firm and sweet; very productive and hardy. July 1st.

Yellow Spanish—Large, pale yellow with red cheek; juicy and very good. One of the best. Last of June.

SOUR CHERRIES (Dukes and Morellos)

Baldwin—Largest, richest and least sour of the Morello type; upright grower and very productive. End of July.

Early Richmond—Most popular sour cherry. Medium, red, quite acid; hardy, healthy, very early and productive. June.

English Morello—The most valuable late cherry. Easily grown, producing a heavy crop every year. Large, very dark red, sub-acid, rich and good; very hardy for extremely cold latitudes. End of July.

May Duke—Large, dark red, rich, juicy and excellent; an old variety; very productive and reliable. June.

Montmorency—One of the most popular of all hardy cherries for market and home use. Is planted largely in all parts of the country. Sells at fancy prices. Large, light red, tender and sub-acid. End of June.

Vladimir—A Russian variety. Hardy, strong grower, very productive, sub-acid, juicy and of excellent flavor. Middle of July.

Apricots

	Each	100
First Class, 4 to 5 feet, 2 year.....	\$.30	\$21.00

Alexis—Large, yellow, red blush, sub-acid, rich and good quality. Middle of July.

yellow with red cheek, juicy and good. Middle of July.

Gibb—Medium, very light yellow, sub-acid. End of July.

Moorpark—One of the largest and finest apricots. Orange with red cheek, rich flavor and very productive. August.

Harris—Medium, hardy, productive, bright

Quinces

	Each	100
First Class, 3 to 4 feet, 2 year.....	\$.30	\$22.00

Champion—Larger than Orange; equally as good; more vigorous and productive, but later. November 1st.

Orange—Sometimes called the Apple Quince Large, bright golden yellow. When cooked it is tender, juicy and of excellent flavor. This is the variety most extensively cultivated. October.

Meech's Prolific—A large, immensely productive variety, frequently bearing fruit when two years of age. Large, orange color, of great beauty and delightful fragrance. One of the best. Last of October.

Rea—A seedling of the Orange, but averages double its size, equally as good and ripens a week earlier. Very productive and bears young.

Mr. Harry L. Squires, Good Ground, N. Y.,

Dear Sir:—The plants arrived all O. K. yesterday; very fine plants indeed, better than I expected at this time of year. Thank you very much.

Respectfully,

Edwin F. Payne.

Mr. Harry L. Squires, Good Ground, N. Y.,

Dear Sir:—The strawberry plants came this afternoon and are fine. Thanking you for same, I am,

Manchester Depot, Vt., Aug. 29, 1913.

Yours truly,

Mrs. W. C. Hard.

Mr. Harry L. Squires, Good Ground, N. Y.,

Dear Sir:—Strawberry plants came yesterday and I set them out this day. They were in good shape and condition, very good plants and roots for this year.

Respectfully yours,

D. W. Clarke.

Middletown, Conn., Sept. 27, 1913.

Mr. Harry L. Squires, Remsenburg, N. Y.,

Dear Sir:—The strawberry plants arrived in fine condition.

Yours very truly,

Chas. A. Smith.

Victorville, Calif., Dec. 3, 1913.

Strong 2 year plants, 30c. each, 4 for \$1.00

AMERICAN
BEAUTY

La France—Rich, satiny peach, changing to deep rose; large and full. A constant bloomer and the sweetest of all.

Magna Charta—Pink and carmine; fragrant; very large and full; a profuse bloomer.

Margaret Dickson—New, hardy and vigorous. A free summer and autumn bloomer. Flowers white with pale flesh center. Delightfully fragrant.

Marshall P. Wilder—Bright cherry carmine; very fragrant and one of the freest bloomers. Vigorous.

Paul Neyron—The largest of all. Deep rose color. A free bloomer and vigorous grower.

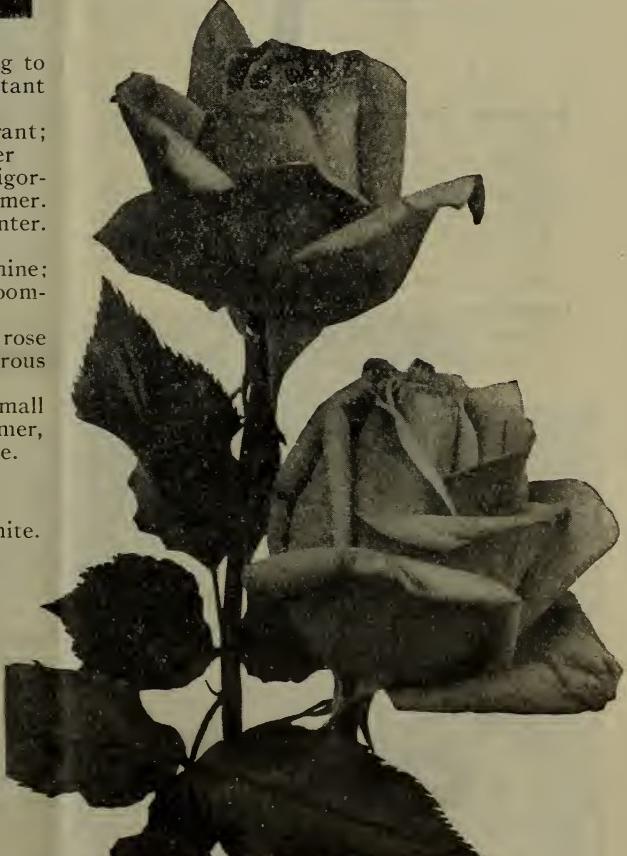

Persian Yellow—Deep, bright yellow; small but handsome; double; very early bloomer, and much the finest hardy yellow rose.

CLIMBING ROSES

Baltimore Belle—Pale blush, nearly white. Blooms in clusters.

Crimson Rambler—An exceedingly vigorous and rapid grower, making shoots eight to ten feet in one season. Entirely hardy and extremely prolific. It blooms in clusters; beautiful crimson color and lasts a long time.

Dorothy Perkins—Similar to Crimson Rambler except in color which is a clear shell pink. Blooms in clusters of thirty or forty and sometimes more. Flowers are very large for a rambler, well formed, very double and fragrant. A strong, healthy grower and very hardy.

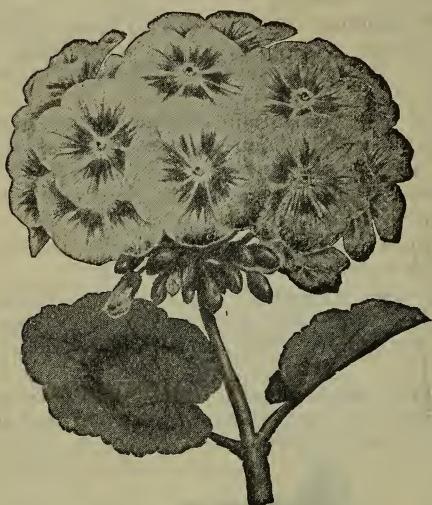

Philadelphia Rambler — A decided improvement over Crimson Rambler. Larger flowers, very double and of more intense crimson which never fades. Blooms about two weeks earlier than Crimson Rambler.

White Rambler — Perfectly hardy and a strong, vigorous grower; flowers white.

Yellow Rambler — Flowers pale yellow, nearly double; fragrant.

Flowering Plants

GERANIUM

Begonias — Flowering. Eight leading varieties. Pot-grown, by express, 12c each; \$8.00 per hundred.

FERTILIZERS

Having made wholesale arrangements with large manufacturers and dealers, I can supply my customers with the fertilizers named below at the prices given, the buyer to pay the transportation charges.

A COMPLETE FERTILIZER FOR FRUIT AND VEGETABLES

Analysis	Per cent.
Nitrogen	3.29 to 4.11
Equal to Ammonia	4.00 to 5.00
Soluble Phosphoric Acid	4.00 to 5.00
Reverted Phosphoric Acid	2.00 to 3.00
Available Phosphoric Acid	6.00 to 8.00
Insoluble Phosphoric Acid	1.00 to 2.00
Total Phosphoric Acid	7.00 to 10.00
Potash (Actual)	4.00 to 5.00

This is the fertilizer I use for strawberries, and it has given me better results than any other I have ever used. It is also good for all kinds of fruit and garden truck. By freight from Philadelphia, \$1.75 per hundred pounds; \$33.00 per ton.

CANADA UNLEACHED HARDWOOD ASHES

Best quality, shipped from Southern Canada, in carload lots of 20 tons or more, \$15.00 per ton.

LIME

Raw Ground Lime Rock, best quality, shipped from Blakeslee, N. Y., \$8.00 per ton.

NITRATE OF SODA

Shipped from New York City, \$3.25 per hundred pounds; \$59.00 per ton.

FISH SCRAP

Shipped from New York City, \$3.25 per hundred pounds; \$56.00 per ton.

Note 1: Under no circumstances will renewals be accepted at this rate; it is exclusively a trial rate for those not now subscribers.

Note 2: This coupon must be sent with the money direct to the publishers; offer is good only when coupon is presented.

The FARM JOURNAL is for the poultryman, farmer, fruit grower, dairyman, trucker, stockman, gardener, villager, suburbanite, the women folks, the boys and girls. Cheerful, clean, genuine, progressive, full of gumption and sunshine; practical as a plow, readable as a novel; knows what to leave out, and what to put in. Illustrated, 32 to 80 pages monthly, stops when the time is up. Mail this Mutual Benefit Coupon to-day with two dimes or ten two-cent stamps direct to the Farm Journal. DO NOT SEND IT TO US

ONE SPRAYER FREE

To introduce the new "KANT-KLOG" Sprayer we offer one free to the first reliable applicant in each locality.

This Sprayer has individual and distinct features found in no other line. The "KANT-KLOG" is the first, and only nozzle ever made to give both flat and round sprays and solid streams. The new Spring Hose Cock starts or stops the spray instantly, so preventing waste of fluid.

Sprays Trees, Potatoes, Vegetables, Vines, Whitewashing, Disinfecting and many other uses.

OTHERS ARE MAKING HUNDREDS OF DOLLARS WITH THIS MACHINE

If you wish either to book the orders in your section, or want a sprayer for your own work, fill out the blank on opposite side and we will send special proposition, descriptive matter, etc.
